

POINTE SERVICE ASSOCIATION, INC
GOLF CART SAFETY POLICY

June 1, 2008

For the protection of owners and operators of golf carts, and the safety of others, the following policy has been adopted by the Executive Committee and becomes effective July 15, 2008,

Golf carts which are operated on Pointe Property at or after dusk must be equipped with front and rear lights which must be illuminated while the golf cart is on a roadway.

Owners of golf carts are reminded to ensure that carts are operated by persons capable of safely operating the cart and who are sufficiently trained to safely operate a cart to avoid injury to themselves or others.

Owners are liable for injury to persons or property caused by the operation of their golf carts in the same manner as they would be liable for the operation of any other vehicle which causes injury or damage.
